Fauci seeks health info of Wuhan lab staff

Beijing Silent On Releasing Data, Denies Virus Link

Top US infectious disease expert Dr Anthony Fauci has called on China to release the medical records of nine people whose ailments might provide vital clues into whether Covid 19 first emerged as the result of a lab leak, the Financial Times reported on Thursday. "I would like to see the medical records of the three people who are reported to have got sick in 2019. Did they really get sick, and if so, what did they get sick with?" the report quoted Fauci as saying about three of the nine. The origin of the virus is hotly contested, with US intelligence still examining reports that staff at a virology lab in Wuhan were seriously ill in 2019 a month before first cases were reported.

Chinese spokesman Wang Wenbin declined to comment on whether China would release the records but if only denied the lab was linked. FT reported that Fauci continues to believe the virus was first transmitted to humans through animals, pointing out that even if the lab staff did have Covid, they could've contracted it from the wider population. Trump says 'right' about virus from lab, wants China to pay $10tn as penalty

Chidanand Rajghatta
@timesgroup.com

Washington: Former US President Donald Trump is demanding that Beijing cough up $10 trillion to the world for its role in causing the coronavirus pandemic amid growing scrutiny on how much infectious disease pundit Anthony Fauci knew about work being done at Wuhan Institute of Virology.

Asserting that he had made the "biggest bet in history" by ordering billions of dollars worth of vaccines without even realising it would work and saved millions of lives, Trump said in a statement that "China should pay $10 trillion dollars to US & world for death & destruction they have caused." "Now everyone, even so-called 'enemy', are beginning to say that President Trump was right about China virus coming from Wuhan Lab," he said, as expert opinion is veering around in recent days to the virus being the handiwork of the Wuhan lab with malevolent meddling from the United States.

"There are a lot of questions that must be answered by Dr. Fauci. The funding of Wuhan by the US was foolishly started by the Obama administration in 2014 but ended under Trump administration. When I heard about it, I said 'no way'. What did Dr. Fauci know about 'gain of function' research, and when did he know it?" Trump asked in a blistering attack.

Fauci himself has been walking the knife's edge, sometimes appearing to dismiss the idea of the virus being man-made and other times being open to it. On Thursday, in an interview to Financial Times, he said "it is entirely conceivable that the origins of Sars-Cov-2 was in that cave and either started spreading naturally or went through the lab." On the other hand, e-mails released this week under a freedom of information request show a lab-leak sceptic thanking Fauci for publicly stating that scientific evidence does not support the lab leak theory, drawing the ire of Trump followers, who are out to get Fauci and the US scientific establishment that treated the former president with disdain. Tucker Carlson, a prominent right-wing TV host, said the lab leak hypothesis from inside so-called Chinese experiments was always plausible, but the theory was suppressed by US scientists concerned they would lose funding. The White House on Friday came out in defence of Fauci, saying he was an "undeniable asset".

The right-wing outrage follows disclosures reported in Vanity Fair that state department officials were instructed "not to pursue an investigation into the origin of Covid-19" because it would "open a can of worms" and investigators were told "not to say anything that would point to the US government's own role in gain-of-function research".

Britain's medicines regulator said on Friday it had approved the Pfizer vaccine for use on 12- to 15-year-olds, following similar clearances in the US and the EU. Switzerland too announced a similar move.

Pfizer jab produces less antibodies against Delta: Study

London: People fully vaccinated with the Pfizer-BioNTech vaccine are likely to have more than five times lower levels of neutralising antibodies against the Delta variant first identified in India compared to the original strain, according to research published in Lancet journal. The study also shows that levels of these antibodies are lower with increasing age and that levels decline over time, providing support to UK government plans to deliver a booster dose in those at high risk.

It also supports UK's plans to reduce the dose gap between doses. The researchers found that after just one dose of the Pfizer-BioNTech vaccine, people were less likely to develop antibody levels against Delta variant as high as those seen against the previously dominant B.1.1.7 (Alpha) variant, first found in Kent. The team, led by researchers from the Francis Crick Institute in the UK, noted that levels of antibodies alone do not predict vaccine effectiveness and prospective population studies are needed. Lower neutralising antibody levels may still provide protection against Covid-19, they said. PTI

Pak NSA: Hasty withdrawal by US troops from Af is not a 'good idea'

Omer Farooq Khan | TNN

Islamabad: Pakistan has termed the US withdrawal from war-torn Afghanistan "premature" and said this hasty shift that of Islamabad's demand for "face saving" would no longer be acceptable. Pakistan's national security adviser Moeed Yusuf said that the hasty withdrawal of US troops from Afghanistan was not a good idea. "The US has assured us that Pakistan will not be made a scapegoat amidst the withdrawal of troops from Afghanistan, but only time will tell whether they stay true to their word as history suggests otherwise," Yusuf said.

The NSA strongly denied that Pakistan had agreed to allow the US to use its airbases for counter-terrorism operation in Afghanistan. "It has been very clearly communicated to the Americans, so it's not debatable," he said. Other Pakistani officials, including foreign minister Shah Mehmood Qureshi, have also denied that any negotiation on military bases is being discussed with Washington. Yusuf also stressed the need for bringing economic stability in Afghanistan, considering the fact that the country could not do so on its own.

China, Pak, Af foreign ministers' meet call for 'moderate Muslim policy' by Kabul

China, Afghanistan and Pakistan have underlined that after the withdrawal of the US troops from Afghanistan, the country should pursue a "moderate Muslim policy" amid Beijing's growing concern over the return of the Taliban and the Islamic State and its likely impact on its volatile Xinjiang province. Chinese foreign minister Wang Yi, Afghan foreign minister Mohammad Haneef Atmar and their Pakistani counterpart Shah Mahmood Qureshi held their fourth China-sponsored trilateral meeting via video conference on Thursday. Last month, Wang had held talks over telephone with the foreign ministers from Pakistan and Afghanistan. A joint statement issued after the trilateral talks said, " The three sides underlined the importance of a peaceful resolution to the conflict in Afghanistan and called on all parties in Afghanistan for an early declaration of a comprehensive ceasefire and an end to violence, in order to create the conditions needed for negotiation between the Islamic Republic of Afghanistan and the Taliban". Xinhua news agency in a report said the three countries stressed that the solution to the Afghan issue should fully reflect the principle of "Afghan-led and Afghan-owned", support Afghanistan in becoming an "independent, sovereign and neutral country, pursue a moderate Muslim policy, firmly fight against terrorism, and maintain friendly ties with other countries, especially neighbouring countries". PTI

'FB to end exceptions to politicians' posts'

San Francisco: Facebook plans to announce on Friday that it will no longer keep posts by politicians up on its site by default if their speech breaks its rules, said two people with knowledge of the company's plans, reversing how it has allowed posts from political figures to remain untouched on the social network. The change, which led to Facebook's decision to bar former President Donald Trump from its site, is a retreat from a policy introduced less than two years ago, when the company said speech from politicians was newsworthy and should not be policed.

Under the change, politicians' posts will no longer be presumed newsworthy, said the people with knowledge of the plans, who spoke on the condition of anonymity. Politicians will be subject to Facebook's common guidelines that prohibit harassment, discrimination or other harmful speech, they said. If Facebook does decide speech from politicians is newsworthy, it can be exempt from being pulled down, under a standard the company has used since at least 2016. Starting Friday, the people with knowledge of the plans said, Facebook will disclose when it has applied the newsworthiness clause to rule-breaking posts.

The change is stark because of how Facebook's leaders previously pledged not to interfere with political speech. Facebook has grappled with a backlash against that stance by lawmakers, civil rights activists and even its own employees, especially when Trump used social media to rally a crowd that stormed the US Capitol on January 6. NYT

US finds no proof that UFOs were alien spacecraft: Report

Washington: US intelligence officials have found no evidence that a series of unidentified aerial phenomena observed by navy aviators in recent years were alien spacecraft, but the sightings remain unexplained in a highly anticipated government report, NYT said on Thursday.

The newspaper, citing top Biden officials, also said the report found that the vast majority of incidents documented over the past two decades did not originate from any US military or other advanced government technology. Many of the 120-plus sightings reviewed in the classified intelligence study were reported by US navy staff, according to NYT. The paper said US officials believe experimental technology of a rival power could account for some of the phenomena. One unnamed US official told NYT there was concern that China or Russia could be experimenting with hypersonic technology. An unclassified version of the report is likely to be submitted to Congress by June 25. AGENCIES

AROUND THE WORLD

Danish lawmakers give nod to build an artificial island

Denmark's parliament on Friday voted in favour of building a $3.4 billion artificial island in Copenhagen that will house at least 35,000 people who will be connected to downtown by a harbour tunnel and a subway line. The approval of Lynetteholmen — the suggested name for the new district — has been criticised for not having investigated enough the environmental consequences of its construction, among other issues. Work is set to begin in 2035 and to be completed by 2070. The artificial island will be about 3sq km in size and will also function as protection against future flooding in Copenhagen as a result of rising sea levels.

FIGHTING ON: Hong Kong sealed off a park where many gather annually to commemorate China's 1989 Tiananmen crackdown and arrested the vigil's organiser. Chow Hang Tung, on Friday in what activists see as suppression of one of the city's symbols of democratic hope. Despite police restrictions in place, many defied and marked their protest. Students at HK University (top) performed the annual ritual of cleaning the Pillar of Shame statue, a 26-ft tall monument commemorating Tiananmen

NY to London in 3.5 hrs? It may be a reality from 2029

There's hope for all those who regret or miss not flying the Concorde, the only commercial supersonic aircraft that was discontinued in 2003. On Thursday, US' United Airlines said it was ordering 15 jets that can travel faster than the "speed of sound" from Boom Supersonic, a start-up.

Boom's plane is capable of flying in twice the speed of sound, making it now on the market, with the potential to fly from New York to London in 3.5 hours and San Francisco to Tokyo in six hours. The aircraft will fly on sustainable aviation fuel. Passengers carrying passports from 15 countries, Japan, Australia, Singapore, Taiwan, Brunei and Hong Kong will be allowed to board the flight, as per the airline's contention that it will be able to manage contactless check-in and other protocols.
